Box No. 11	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This interna	tional search report has not been established in respect of certain claims under Article 17(2)(a) for the following
_	Claims Nos.:
	because they relate to subject matter not required to be searched by this Authority, namely:
	Claims Nos.: 45-64 in part
	because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
	see extra sheet
3.	Claims Nos.:
	because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)
Box No. III	
-	ational Searching Authority found multiple inventions in this international application, as follows:
i rus interna	monal Seatching Authority found indiriple diventions in dus international application, as follows.
	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite
	Payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report
	covers only those claims for which fees were paid, specifically claims Nos.:
	·
4.	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark or	The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: II.2

Present claims 45 to 64 refer to a large number of possible agents and their use. These agents are defined by a desirable property namely, antagonist/agonist or regulator of TLR-2 or TLR-4. The claims cover all substances and compounds having this property, whereas the application does not provide support within the meaning of Article 6 PCT for any specific example of such substances or compounds. Because the claims lack support, no meaningful search encompassing their entire scope is possible.

The Applicant's attention is drawn to the fact that claims relating to inventions in respect of which no International Search has been established need not be the subject of an International Examination.
